

Mylan Receives Approval for Generic Version of Arimidex(R) Tablets

PITTSBURGH, June 29, 2010 /PRNewswire via COMTEX News Network/ -- Mylan Inc. (Nasdaq: MYL) today announced that its subsidiary Mylan Pharmaceuticals Inc. has received final approval from the U.S. Food and Drug Administration (FDA) for its Abbreviated New Drug Application (ANDA) for Anastrozole Tablets, 1 mg, the generic version of AstraZeneca's Arimidex(R) Tablets, a treatment for early breast cancer.

Anastrozole Tablets had U.S. sales of approximately \$917 million for the 12 months ending March 31, 2010, according to IMS Health. The product is available for immediate shipment.

Currently, Mylan has 136 ANDAs pending FDA approval representing \$94 billion in annual brand sales, according to IMS Health. Forty-one of these pending ANDAs are potential first-to-file opportunities, representing \$20.4 billion in annual brand sales, for the 12 months ending Dec. 31, 2009 according to IMS Health.

Mylan Inc. ranks among the leading generic and specialty pharmaceutical companies in the world and provides products to customers in more than 140 countries and territories. The company maintains one of the industry's broadest and highest quality product portfolios supported by a robust product pipeline; operates one of the world's largest active pharmaceutical ingredient manufacturers; and runs a specialty business focused on respiratory, allergy and psychiatric therapies.
